Letter of Recommendation

It gives me immense pleasure to recommend Mr Chinmay Bagade for the Master's course at your esteemed university. I have known Chinmay since the very first year of his Bachelor's engineering as his professor for practicals in the subject 'Basic Mechanical Engineering' at Maharashtra Institute of Technology, Pune. I was also delighted to be the mentor for his industrial internship at Godrej Precision Engineering, Vikhroli.

During the practical sessions, I found Chinmay to be a very sincere and interactive student. He was very attentive in class and always showed a positive attitude towards academics. He would always ask questions in case of any doubts. He is quick in grasping and understanding the concepts and their applications. He would also complete all his assignments on time. His optimistic and assiduous nature combined with his curiosity and intelligence made him stand apart from others.

As Chinmay's mentor for his industrial internship, I would visit the industry for their feedback and would always receive positive remarks on his work ethic and technical capabilities. He worked on multiple projects and assignments at the industry. He presented two different efficiency improvement projects as his Industrial Case Study Assignments in the 6th and 7th Semester and received praises from the external examiners for his presentations as well which is evident from his 'O' grades in both the semesters for the same. His industrial mentor would praise his grasping capability as well as his understanding of the workflow. His quick understanding of the working and understanding the application of their newly adopted ERP (Enterprise Resource Planning) System, Infor, was also highly praised by his industrial mentor.

In addition to his academic performance and curiosity to learn new concepts, his tendency to help others, stay grounded and share his knowledge is what is rarely seen in a student. I believe his consistency and perseverance will take him miles in achieving his goals at your University and will help him also grow as an individual in the community. He has always been a confident young student and is capable of succeeding in any field he undertakes. Thus, I feel extremely happy to recommend him for the Master's Program at your University. I wish him luck for his future endeavours. Please feel free to contact me if you have any questions regarding Chinmay or his academic work.

Sincerely,

Prof. Sanjay Rümde
Assistant Professor

Department of Mechanical Engineering
Maharashtra Institute of Technology, Pune.
